Professional Summary

Information Technology undergraduate with experience in full-stack web development and IoT-based embedded systems. Built healthcare and responsive web applications through internships and academic projects, with national-level hackathon participation. Focused on building practical technology with real-world impact.

Experience

Full-Stack Intern

Feb – June 2026

Grevya Technologies

- Contributed to the development of the company website with responsive and user-friendly design
- Collaborated with developers on frontend implementation and feature integration
- Worked with modern web technologies to improve website performance and usability
- Gained practical exposure to AI/ML workflows and software development practices.

AJ & VG Media Pvt Ltd

May - 2025

- Developed a full-cycle ERP & CRM Jewellery Management System using React.js and SQL.
- Built inventory, sales, billing, customer, and order management modules for jewellery business operations.
- Implemented gold weight tracking, pricing calculation, and real-time inventory update features.
- Designed and optimized SQL databases with CRUD operations for efficient data management.

Projects

Accident Detection and Alert System | ESP32, GPS, GSM, MPU6050

2026 – Present

- Built a smart accident detection system for vehicles using accelerometer and gyroscope data
- Implemented rule-based detection combined with TinyML for improved accuracy
- Integrated GPS and GSM modules to automatically send emergency alerts with live location
- Added a cancellation mechanism to reduce false emergency notifications

Personal Portfolio Content Management System | React.js, Spring Boot, REST APIs

Aug – 2025

- Developed a Personal Portfolio Content Management System using React.js and Firebase.
- Built dynamic modules to manage projects, skills, achievements, and portfolio content.
- Implemented Firebase for real-time data storage, authentication, and content management.
- Designed a responsive and user-friendly interface to ensure seamless access across devices.

Online Food Delivery System | React.js, Spring Boot, REST APIs

Nov – 2025

- Developed an Online Food Delivery System using React.js and Firebase.
- Built customer, order, and delivery management modules for seamless food ordering and tracking.
- Integrated AI-based analytics to analyze user behavior and order activity for data-driven insights.
- Implemented Firebase for real-time data management, authentication, and responsive application performance.

Technical Skills

Languages: Java, JavaScript, SQL, Data Base

Frontend: HTML, CSS, React.js, Software Testing, AWS

Backend & Frameworks: Spring Boot, REST APIs

Tools & Platforms: Git, GitHub, VS Code, SQL Workbench, Eclipse, AntiGravity, Selenium,

Achievements

- Smart India Hackathon Participant
- Core Organizer – Avantaa 2024, SKCT
- React (Coursera), AI for Everyone (Coursera), DevOps & SQL (Udemy)

Education

Sri Krishna College of Technology (SKCT)

Bachelor of Technology in Information Technology — CGPA: 6.7

Coimbatore, Tamil Nadu

2023 – 2027
